

**REMARKS:**

The only change that was made with this supplemental amendment is the incorporation of one new figure, Figure 10, to more clearly illustrate some of the features of the invention, and the attendant brief description and detailed description of the new figure.

Support for the features of Figure 10 and the description thereof can be found in the specification as originally filed. Specifically, page 20, line 14 through page 21, line 8 of the originally filed specification details that the center lines of the flanges of adjacent tie brackets are positioned at intervals of one foot, starting at 6 inches from either end of the form. At page 19, lines 15-17 of the specification, it is stated that the flanges of the tie brackets have a height equal to that of each insulating panel. Support for the relative size of the projections and notches can be found on page 18, lines 4-8 of the specification, and support for the spacing of the projections and notches is found at page 21, lines 9-13.

## CONCLUSION

For the foregoing reasons, as well as the reasons presented in the amendment of December 15, 2003, all the claims now pending in the present application are believed to be allowable, and the present application is believed to be in condition for allowance. Accordingly, favorable reconsideration of the application in light of the amendment and remarks is respectfully requested.

If the Examiner has any comments or suggestions that could place this application in even better form, the Examiner is requested to telephone the undersigned representative at the number listed below.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Randy Shay". The signature is fluid and cursive, with the first name "Randy" and last name "Shay" clearly distinguishable.
